

## Laying Instructions

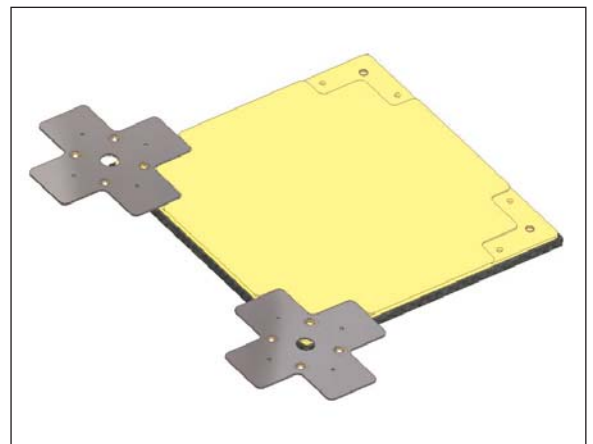

### 1. Floor tile and cross-shaped laying tool

### 2. Modular Principle: First positioning, then “click”

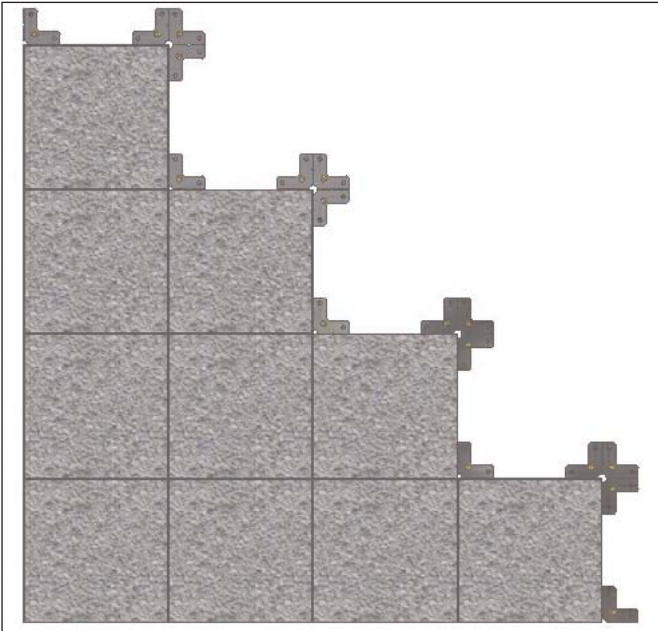

1. Adjust the two chamfered bumps of the cross-shaped laying tool onto the indentation of the floor tile.

2. Slightly press the metallic button. The floor tile will be fixed with the cross-shaped laying tool when you hear a “click”.

## Laying Instructions

### 3. Start in the corner with four lines

Start in the corner by laying four lines. (see figure left).

Important: Each floor tile has to be positioned first, then adjust the floor tile by slightly pressing. A “click” must be heard – the floor tile is fixed.

Carry on with laying line by line. (see figure below).

### 4. Laying line by line
